

ALINA KABANETS

Product & Design Engineer | Product design · React / TypeScript

aokabanets@gmail.com · +44 7506 991370 · alinakabanets.com | [GitHub](#) | [LinkedIn](#)

Fully authorised to work in the UK · London - hybrid or remote

SUMMARY

Product and design engineer who takes a feature from the user problem and the business goal, through design, to shipped React / TypeScript, and then measures what changed. At Deaku, an AI-native startup, I own the design stage and have refined the founder-built assistant, agent and MCP features across web and mobile. I'm most interested in how people come to trust an AI agent: what it shows, what it asks, and when it stops.

SKILLS

Design: product and interaction design, UX for agentic features, design systems, information architecture, user flows, RBAC / permissions modelling, accessibility, Figma

Engineering: TypeScript, JavaScript, React, Next.js, React Native, HTML, CSS, Tailwind CSS, Sass, Redux, REST APIs

Product & measurement: funnel definition, event instrumentation, activation and retention metrics, KPI trees, success criteria, user research

AI-native development: Claude Code (multi-agent, role-based workflows), Figma MCP, Cursor, Zed, MCP integrations

EXPERIENCE

Product Engineer - Deaku Apr 2026 - present · UK, remote

Five-person AI-native startup building a collaborative workspace for professional creators.

- Own the design stage of delivery: every ticket needing a UX or UI decision comes through me and is approved before engineering starts.
- Led the UX review of the AI feature set (assistant, agent, MCP) with light evals: 76 issues and recommendations on what the agent shows, asks and does; about 90% adopted. Now designing and building in-product onboarding for three AI features, with activation criteria defined up front.
- Designed and built 80+ features and fixes across the Next.js web app and the React Native / Expo mobile app, including the whole-app EULA acceptance gate and the cross-platform workspace-invitation flow.
- Defined the company's first measurement layer: a six-metric funnel from visit to free-to-paid, linked to revenue targets as a KPI tree. Used it to find where visitors were leaving.
- Redesigned and rebuilt the landing page in two days: turned a 20-screen feature tour into one focused page with a single call to action. Its structure, pricing logic and section-level tracking are live.
- Work agent-first: a ~10-agent Claude Code setup with distinct engineering roles, and I design directly in code against the team's style guide.

UX/UI Designer & Front-End Contributor - Vigorant Oct 2025 - Mar 2026 · US, remote

Borna Care: multi-tenant, HIPAA-regulated healthcare SaaS. Contract.

- Designed two MVP products from scratch, a patient portal and an admin portal, and took them to shipped UI in about 4 months, owning research, user flows, information architecture and visual design through to developer handoff.
- Built the platform's design system in Figma (components, spacing and type scales, interaction patterns) and owned it as it scaled to multi-clinic setups.
- Designed the standalone Forms product, which won Borna's first paying client.
- Resolved ambiguous role-and-permission requirements with a single permissions matrix that engineers implemented without rework.
- Tested the built product before launch and documented 60+ bugs; contributed UI fixes in code.
- Given lead product designer responsibilities; onboarded and mentored a supporting designer.

Front-End Developer (Traineeship) - Mate Academy 2022 - 2025 · remote, part-time alongside relocation

- React / TypeScript / Redux applications and responsive interfaces from Figma; 100+ pull requests across 80+ repositories with weekly peer code review.

Photographer - self-employed 2014 - 2022 · Ukraine

- 250+ client projects, eight years of daily Photoshop and Lightroom - the training behind the eye for hierarchy, spacing and detail.

EDUCATION

BSc (Hons) Psychology, Taras Shevchenko National University of Kyiv, 2013 · Front-End Developer Certificate, Mate Academy, 2025 · Google UX Design Certificate, 2025
